## ABOUT US

Sepidan Osareh Jonoob Company is one of the biggest producers & exporters of licorice products in the world.

Our company is a very reliable source of supplying licorice extract Powder, Blocks, Granules, Paste (Liquid), DGL and related products.

Our production capabilities are 20 metric tons of either Blocks or Powder per day.

Our modern production facilities can supply you with premium grade products in accordance with your required & requested specification.

As a supplier we feel responsibility both environmentally & socially and we are dedicated to satisfy our customers needs & concerns.

As a matter of facts we welcome buyers to audit our factory & we would gladly adopt to the potential buyers guidelines & specification upon signing contracts.

We are proud to announce that in recent years we have established a licorice factory in the Republic of Azerbaijan.

We offer excellent quality with competitive market prices, having a long history of exporting to Europe such as Germany, Italy & Denmark, Asia, Latin America & other parts of the world.

For accreditation of our achievement , Sepidan Osareh Co. is prouded to be nominated in 2020 as unique Iranian exemplary exporter company for obtaining the European quality management standards by reputable *CBI Europe* a subsidiary of Netherlands Enterprise Agency, founded by Netherlands Ministry of Foreign Affairs.

# Licorice Extract Powder

## Inside the Factory

By using the most modern and the most specialized machineries in the factory production lines, Sepidan Osareh Co. has succeeded to produce high quality licorice various products types in huge amounts in Middle East region; for achieving this goal, the company has installed in production lines the machinery like: extractors, Filtration system, Evaporators and Spry – Dryer system.

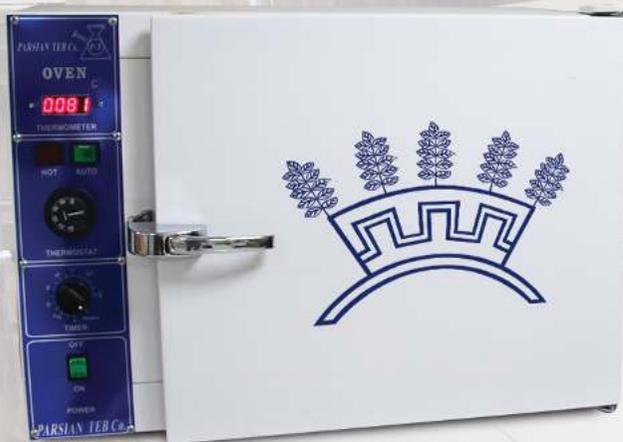

# LABORATORY

Sepidan Osareh Jonoob Co. has a modern laboratory. It is equipped by the most modern & advanced devices. Our specialists test the samples according to the 2343 standard.

The specialists analyze the produced samples with the most advanced and up-to-date HPLC device.

### Licorice extract blocks packing

After production and before getting cold, the product will be lined up in 5 kilograms molds and then be wrapped in nylon sacks, conserving the net weight of 5 kilograms; on the second phase every five sacks, will be sorted in a carton box, totally 25 K.G weight, ready for export to international markets. All the packing activity is done by skilled manpower and machineries, according to European standards.

### Licorice extract paste packing

Licorice extract paste has very flexible texture; because of this property, Sepidan Osareh choose the convenient food container bulks, which are very beneficial in packing process in order to keep the form and taste of the product; the fifty kilograms sealed barrels are sorted in factory mechanized warehouse according to European standard, waiting to export to the international markets.

### Licorice extract powder packing

Once the licorice extract powder ended to 25 kilograms nylon sacks, the top part, will be sealed and packed consequently in the composite envelopes; but it might be diversified packing, both in size and volume according to customer request and standard. The packaging process is highly observed by European standards.
